PROJECTS

- **PHONEBOOK MANAGEMENT SYSTEM**
  The Phonebook Management System aims to store contacts for individual users securely. No one can access another person's contacts. It is essentially a CRUD application, developed using **HTML, CSS, JavaScript, Bootstrap, JSE, JSP, Servlets,** and **DBMS** with **MySQL**.

  - Development Tools – NetBeans,   Server – Apache Tomcat

- **TECH BLOG**
  The Tech Blog project aims to share information about technology. In this application, users can create accounts, post content, and like posts. I used **HTML, CSS, JavaScript, Bootstrap, JSE, JSP, Servlets**, and **DBMS** with **MySQL** for development.

  - Development Tools – NetBeans,   Server – Apache Tomcat

- **BHARAT PLANTATION**
  The Bharat Plantation Project aims to plant trees across India. In this application, main members are hired for each state to oversee and manage the plantation work effectively. I used **HTML, CSS, JavaScript, Bootstrap, JSE, JSP, Servlets,** and **DBMS** with **MySQL** for development.

  - Development Tools – NetBeans,   Server – Apache Tomcat

- **SHOPPING WEBSITE**
  I am a member of this live project for a shopping website. I used **HTML, CSS, JavaScript, Bootstrap** for the frontend, with **PHP** for the backend and **MySQL** for the database, including email validation.

  - Development Tools – Vs Code
